ICD-10 Deadline October 1, 2015: Train Your Staff

Get Ready Now with the New CMS [Quick Start Guide!](#)

While ICD-10 is almost here, you still have time to get ready. But you must get ready now.

Each day this week we are highlighting 1 of the 5 steps from the new [Quick Start Guide](#): 1) Make a Plan, 2) Train Your Staff, 3) Update Your Processes, 4) Talk with Your Vendors and Health Plans, and 5) Test Your Systems and Processes. Today our focus is:

Step: 2 Train Your Staff

The graphic features a dark blue header with the text "ICD-10 Get Ready Now!". Below this is a light blue section with a large blue circle containing the number "2" and the text "Train Your Staff | Get Up to Speed". This section is divided into two columns by a vertical dotted line. The left column is titled "Clinical" and includes the text "Focus on documentation, new clinical concepts captured in ICD-10" and an icon of a doctor. The right column is titled "Coding/Administrative" and includes the text "Focus on ICD-10 fundamentals" and an icon of a person at a computer. At the bottom of the graphic is a dark blue footer with the text "Identify top codes and code current cases in ICD-10". A small CMS ICD-10 logo is located in the bottom right corner of the graphic.

- Train staff on ICD-10 fundamentals using the wealth of free resources from CMS, which include the [ICD-10 website](#), [Road to 10](#), [Email Updates](#), [National Provider Calls](#), and [webinars](#). Free resources are also available from:
 - Medical societies, health care professional associations
 - Hospitals, health systems, health plans, vendors
- **Identify top codes. What ICD-9 diagnosis codes does your practice see most often? Target the top 25 to start. You might want to look at common diagnosis codes available from:**
 - [Road to 10](#) (see Specialty References)
 - Medical specialty societies
 - Using the documentation available, code current cases in ICD-10. Flag any cases where more documentation is needed.

Tips

- Training for **clinical staff**—e.g., physicians, nurse practitioners, physician assistants, registered nurses—should focus on documentation, new coding concepts captured in ICD-10
- Training for **coding and administrative staff**—e.g., coders, billers, practice managers—should focus on ICD-10 fundamentals
- You can review your superbills, encounter forms, and practice management system reports to identify your most commonly used ICD-10 codes
- If time permits, expand your ICD-10 coding of current cases to include 50 or more of your top codes, until 80% of your claims are covered
- You don't have to use 68,000 codes—as you do now, your practice will likely use a very small subset of ICD-10 codes
- You will use a similar process to look up ICD-10 codes that you use with ICD-9
- While crosswalks from ICD-9 to ICD-10 can be useful references, ICD-10 codes should be based on the clinical documentation rather than selected from a crosswalk
- Practices that do not prepare for ICD-10 will not be able to submit claims for services performed on or after October 1, 2015

To learn more about getting ready, visit [cms.gov/ICD10](https://www.cms.gov/ICD10) for free resources including the Road to 10 tool designed especially for small and rural practices, but useful for all health care professionals.
