Specify diagnosis and treatment for

Diabetes

- Document and specify type:
 - Type I
 - Type II

Documentation should reflect the following:

- State if hypoglycemia is or is not causing coma
- Clarify cause and effect relationship between diabetes and other conditions (e.g., diabetic peripheral vascular disease, diabetic foot ulcer, diabetic kidney disease)
- Specify long term use of insulin
- List underlying conditions, drug or chemical responsibility for secondary diabetes (e.g., steroid induced)
- Detail insulin underdosing or overdosing related to an insulin pump malfunction
- Differentiate when diabetes is accompanied by hypo or hyper glycemia
